Houten figuren op knijpers met Art Metal verf en deco-folie

v15769

Verf deze houten kerstfiguren met Art Metal verf en versier ze verder met deco folie details bevestigd met dubbelzijdig klevend power tape en Dodz zelfklevende stippen. Werk af door een decoratieve metalen clip aan de onderkant van de versierde figuur te bevestigen met een lijmpistool. De houten figuur kan nu op de kerstboom geklikt worden of gebruikt worden als decoratie op kerstcadeautjes.

Hoe werkt het

1 The wooden figures come with a string for hanging. If you want to attach a metal peg onto the bottom of the figure, then cut off the string using a craft knife. Keep the string if you want to use the figure for hanging. Paint the figures with Art Metal paint and black Plus Color craft paint. You don't need to make the lines straight as these areas will be decorated with deco foil.

2 Attach power tape where you want to add the shiny deco foil details. On the nut cracker we have attached power tape around the rim of the hat, along the top edge of the boots and sleeves as well across the chest for cross-braces.

3 Cut a small piece of deco foil in your chosen colour and rub the back of the deco foil firmly onto the double-sided adhesive tape. Carefully pull off the deco foil sheet. If the deco foil has not transferred completely, just repeat the process and rub on some more deco foil where needed.

4 Attach round Dodz adhesive dots onto the nut cracker for the details on the hat and the shoulders. Use them on the snowman and the elf for buttons and noses. Dodz adhesive dots stick like double-sided adhesive tape. Attach the deco foil by rubbing it on, following the same procedure as described above.

5 Attach a decorative metal peg onto the bottom with a glue gun.
