

Ster gemaakt van Vivi Gade Design papier

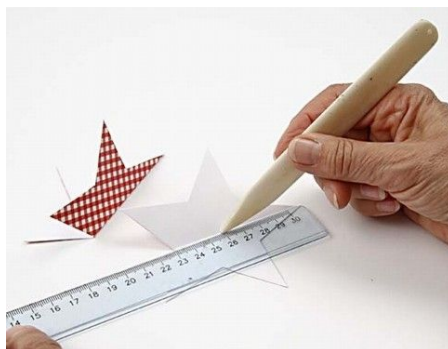

v11896

Vivi Gade Design Paper is glued onto the punched out stars. Then the stars are sewn together down the middle on the sewing machine. They are decorated with prism beads and paper yarn.

Hoe werkt het

3. De ster is geknipt uit Vivi Gade Design papier. Het is gelijmd op uitgestanste sterren en in het midden aan elkaar genaaid. Gedecoreerd met prisma kralen en papiergaren.

4. Place three stars on top of each other so they fit exactly. Glue paper onto the top and bottom star on the side which is facing towards the star in the middle.

5. Glue the two stars onto the back of your chosen paper.

6. Cut out the star.

7. Score along the middle with a bone folder making a fold.

8. Put the three stars together and sew them together on the sewing machine slowly with large stitches.
