

Pop van bloemendraad met een jurk van vilt

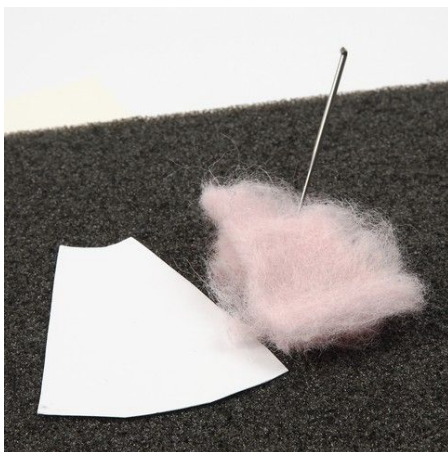

v12954

Deze hangende pop is gemaakt van bloemendraad gekleed in een jurk gemaakt van prikvilt en een hoofd van stof.

Hoe werkt het

1. Shape the doll's body and arms from floral wire. Attach the stuffed fabric head with a glue gun and draw facial features with a marker pen. TIP! Instead of attaching the head with with a glue gun, you may start shaping the doll's body by inserting the floral wire through the head.

2. Needle felt a dress using the template.

3. Wrap the dress around the doll's body and needle felt it onto the body securely by adding small needle felted dots in a different colour.

4. Needle felt some hair onto the doll's head. Attach a piece of embroidery yarn onto the hair for hanging.

5. Thread a bead onto the piece of yarn for hanging and glue a polyresin crown and a fabric bow onto the doll's head.
