

Gevlochten leerpapieren hart

v14981

Deze mand in de vorm van een hart is gevlochten van stroken van leerpapier. Gebruik om op te hangen een stuk leerkoord gedecoreerd met kralen.

Hoe werkt het

1 Weave the heart basket following the step-by-step instructions on the pack up to and including step 7. Make the loop on the right as illustrated.

2 Push the loop on the left through in the same manner.

3 Trim the paper star stripperpendicular to the edge.

4 Bend the paper strip that was underneath and cut it at an angle to insert it under the transverse strip, thereby hiding and fastening it.

5 Turn over and copy on the other side.

6 Make a hole at the top with hole punch pliers or a darning needle.

7 Thread a 1mm leather cord through the hole. Decorate the doubled-over leather cord with wooden beads and tie a knot.
