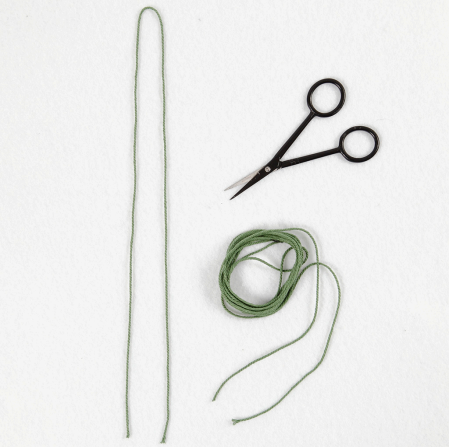
Hangende geknoopte kerstboom

v15748

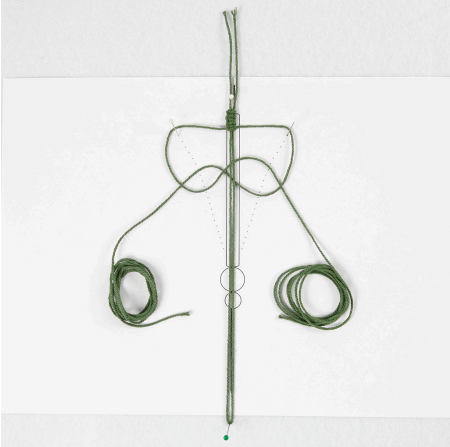
Maak deze hangende kerstboom met behulp van de macramé techniek. De kerstboom is geknoopt van katoenkoord en gedecoreerd met houten kralen.

Hoe werkt het

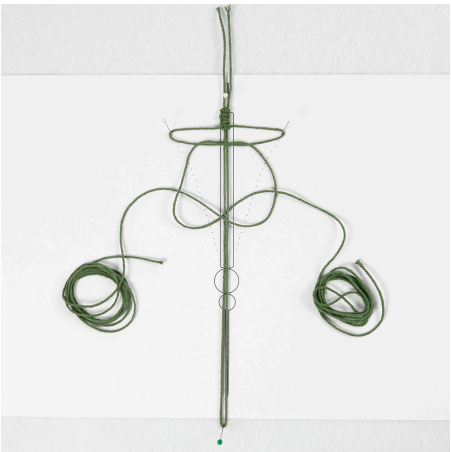


1 Cut a 50 cm piece of cotton twine, double it over and cut another piece of cotton twine measuring 210 cm.

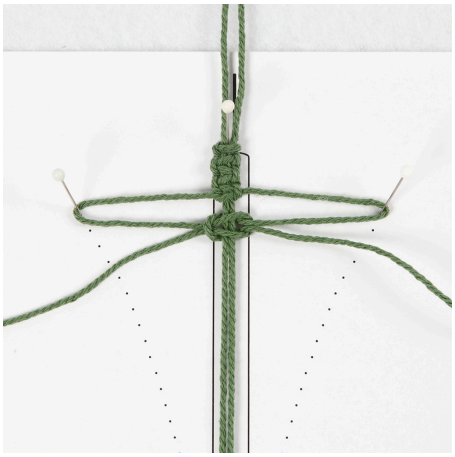
2 Print the template which is available as a separate PDF file on this page. Place the template upside down onto an underlay which you can push pins into. Secure the doubled-over piece of cotton twine with the loop at the bottom, pointing towards yourself. Place the long piece of cotton twine across at the top and make 5-6 macramé knots as shown in the photo. This will be the tree trunk.



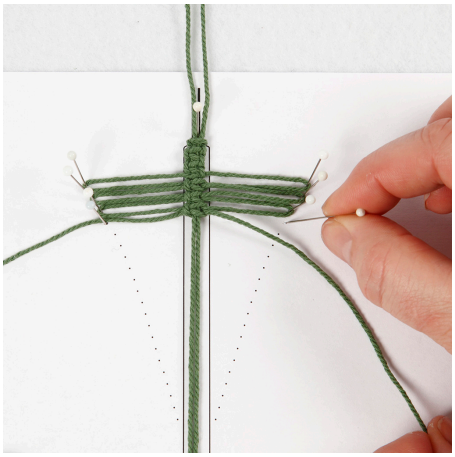
3 Push pins into the first two dots opposite each other on the template. Wind the cotton twine around the pins.



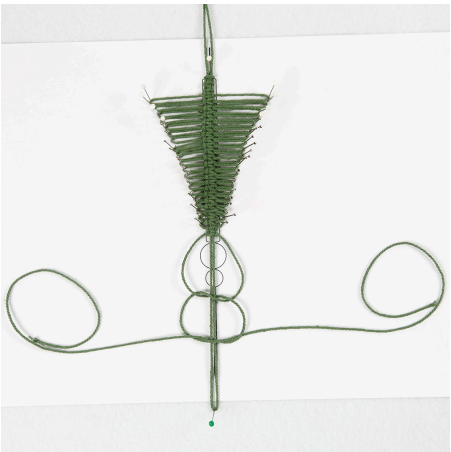
4 Make two macramé knots.



5 You have now made the first ”branch”.



6 Continue with this technique until there are no more dots left on the template.



7 Make two macramé knots at the top of the tree when all the branches are made.

8 Secure the excess cotton twine with a needle.

9 Thread two wooden beads onto the loop.
