

Haarspeld gedecoreerd met glaskralen en rocailles

v15521

Maak zelf zo'n prachtige haarspeld door er glaskralen en rocailles op te naaien.

Hoe werkt het

1 You will need a 90 cm piece of jewellery wire and 33 glass beads for this hair clip. Thread 28 beads onto the wire and tie together with a knot.

2 Thread one wire end through the hole in the tip in the hair clip.

3 Sew around the hair clip; make a stitch between each bead. Finish at the tip of the hair clip by sewing on another glass bead.

4 Tie the wire ends together firmly to secure.

5 Thread a bead onto another piece of jewellery wire. Thread both ends of the jewellery wire through the hole at the end of the hair clip.

6 Sew on another 3 beads; one at a time.

7 Sew on the last (fourth) bead.

8 Secure the end of wire on the back of the hair clip.

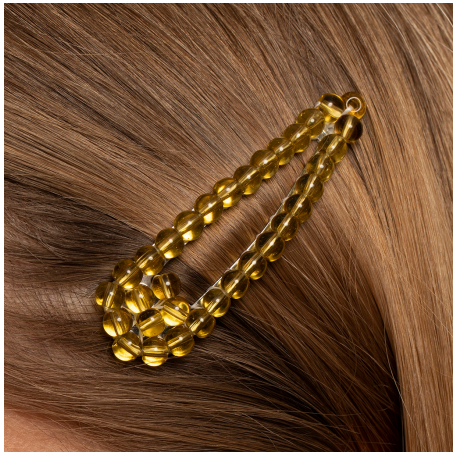

9 The finished hair clip.

10 You may use the same procedure when making a hair clip with rocaille seed beads. Here we have sewn on seven beads like a flower at the end of the hair clip.
