

## Colourful mouse mats with fingerprints

v16208

Make these beautiful and fun mouse mats with Textile Solid paint, silk salt and amusing prints made with fingers and hands. A fun and practical gift idea which stimulates children's creativity and imagination.

### *Hoe werkt het*

**How to do it:** Apply water to the fabric surface of the mouse mat using a brush.

**2** Brush Textil Silk paint onto the surface – either pure or diluted with water. Experiment with both options, causing the surface to change in colour.

**3** Sprinkle silk salt onto the wet Testil Silk paint and leave to dry.

**4** Brush off the silk salt.

**5** Dab Textile Solid paint onto your hands or fingers and print fun designs onto the mouse mat. Leave to dry.

**6** Use paint and a foam pencil brush for the eyes. Leave to dry.

**7** Use a plastic lid dabbed with Textile Solid paint (on the rim) to make bubbles.

**8** Add further details with textile markers.

**A tip** You may draw sketches of possible designs first. What can handprints and fingerprints be transformed into? The fish are made with a thumb print and the tails with fingerprints.
