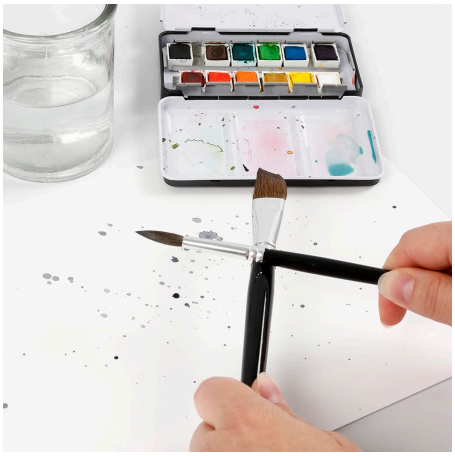
# A watercolour collage

v16131

Paint watercolours using your imagination. Cut out and stick on to make a collage with wavy shapes.

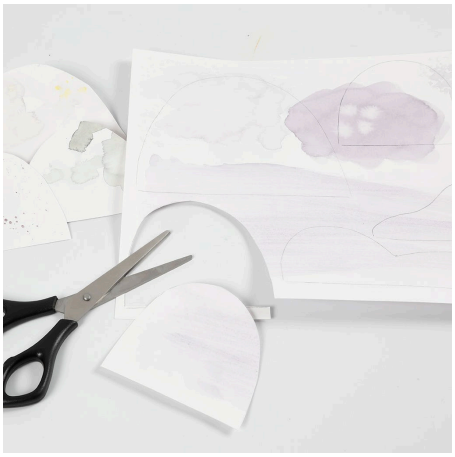
## Hoe werkt het

**Example 1:** Paint an area with your chosen colour. Now dab this area with a piece of kitchen roll or cloth whilst the paint is still wet.



**Example 2:** Dip the brush in plenty of paint and tap it against another brush to make a splatter effect.

**Example 3:** Drip a bit of clean water with a brush onto a layer of damp paint.



**4** Print the PDF file for this idea. When the paint is dry, place the templates on the painted watercolour areas and cut out.

**5** Place the parts on top of each other onto a whole piece of watercolour paper to make a collage. Start from the top. Preferably using decoupage lacquer, but you may use a glue stick as an alternative.

**6** Trim the excess protruding over the edges using a pair of scissors.
