

Gevlochten armband met luxe kralen en magnetische sluiting

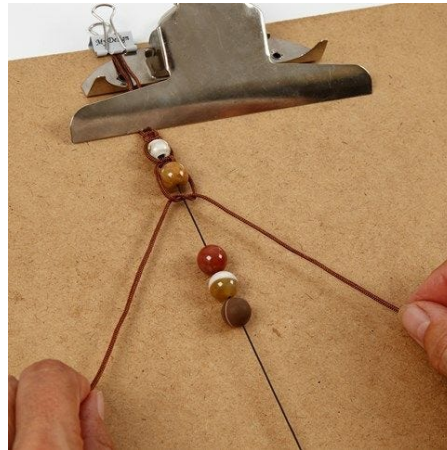

v13941

Deze armband is gevlochten met macramé koord en luxe kralen. Een magnetische sluiting is aan de uiteinden gelijmd.

Hoe werkt het

1. Cut two pieces of 2mm macramé cord, each measuring 70cm. These will be used for the actual braiding. Also, cut a 1mm macramé cord. This will be used to thread the beads onto. Attach the three cords onto the clip in a clip board, placing the thin cord in the middle. Make two double braidings.

2. Loosen the middle cord from the clip at the bottom and thread a bead onto the cord. Re-attach the cord in the clip and make a double braiding before threading another bead onto the cord, pushing it up when needed. See idea No. 12499 on our website for further instructions.

3. Finish with two double braidings. Trim the ends and glue on the two-part magnetic clasp; one part at each end. Leave to dry.
