A Spider's Web made from black Kraft Paper

v13903

This black spider's web is made from Kraft Paper which is cut in a decorative doily-style pattern. A string for hanging is attached to the spider's web.
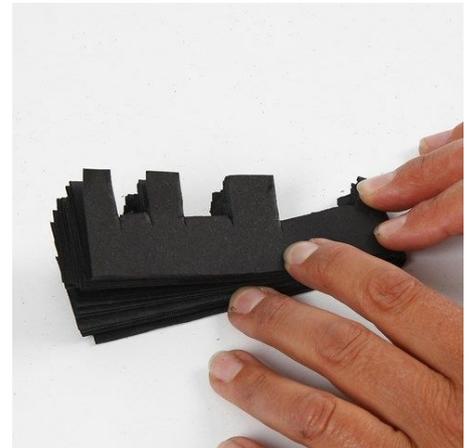

Hoe werkt het

1. Attach two pieces of Kraft Paper together with power tape. Fold a concertina pattern from the narrow length and along the entire length.

2. Cut out small squares from each side and towards the middle as shown.

3. Fold in the middle.

4. Staple together in one or two places along the fold and unfold the fan to make a round spider's web. Repeat the procedure at the opposite side.
