

## Armband met halfedelstenen

v12162

Geknoopt met macramé koord met multi-facette halfedelsteen kralen en knopen van kristal. Een metalen kraal met tekst is verwerkt in de geknoopte sluiting van de armband.

### *Hoe werkt het*

**1** Cut two pieces of 2mm macramé cord measuring approx. 80cm and one piece of 1mm macramé cord measuring 40cm. Fasten the first 10cm of the cord onto a clipboard. Braid with the thick cords and thread the stones onto the 1mm cord.

**2** Thread the crystal button onto the middle cord and pull the braiding tight underneath.

**3** Finish braiding the bracelet and alternate between a stone and a button.

**4** Thread the two ends of the thin cord through the metal text bead from each side.

**5** Continue braiding over the thin cords until the bracelet has the required length.

**6** Cut off the ends and melt them.

**7** ... and immediately press them firmly onto the back using a pair of scissors.

**8** The thin macramé cord has a plastic core which is then pulled out.

**9** Lightly melt the end and thread on a mini silver bead.

**10** Tie a knot and melt this very carefully.
