

Armbanden

v11365

Drie armbanden, elk in een andere kleurstelling met prachtige glaskralen geregen op elastisch koord. Snel en gemakkelijk.

Hoe werkt het

1 Measure the elastic cord around your wrist to the desired length. Thread beads onto the elastic cord.

2 Finish off by tying a knot. Tie this beside a bead with a large hole, so the knot can be hidden in it.

3 Tie four or five very tight knots – you can use reef knots if you wish. **TIPS** To ensure that the knot is secure, you can put a bit of glue into the knot.
