

Platte gevlochten sterren

v11942

Sterren gevlochten van Vivi Gade vlechtstroken (de Oslo serie). Hang deze aan een stuk goudkleurig draad met parels.

Hoe werkt het

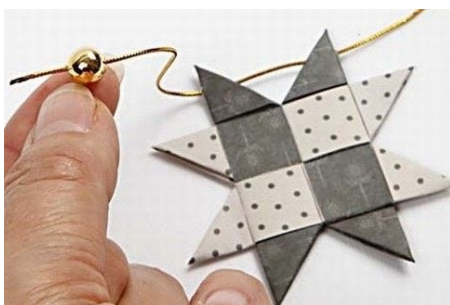

1 Weave the stars following the instructions included in the package. Finish after step No. 15.

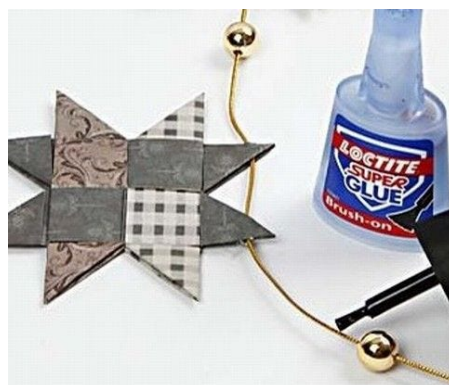

2 Cut off the ends.

3 Use a needle when attaching the stars onto a piece of gold thread.

4 Melt the ends of the thread for threading the beads onto the thread.

5 Glue the beads onto the thread. Apply a blob of glue and thread the beads onto the thread, over the glue.
