

Gevulde harten

v11861

Deze harten geknipt uit Vivi Gade Design papier, zijn langs de randen genaaid met de naaimachine en gevuld met polyester vulling.

hoe werkt het

1 Draw a heart using the template and cut out – cut two hearts for each hanging decoration.

2 Apply some glue to the arches of the heart, attach the ribbon at the top and glue the hearts together, leaving an opening.

3 When the glue is dry, stuff some polyester stuffing inside and sew around the edge on the sewing machine. Use the hearts as decoration for the Christmas tree, as decorations for the window or as a gift wrapping decoration.
