

## Armband met engel en facetkralen

v12272

Natuurlijke steenkralen, kristal facetkralen en metalen onderdelen zijn geregen op een stuk elastisch koord en aan elkaar geknoopt met stevige, strakke platte knopen.

### *Hoe werkt het*

**1.** Thread the different beads and the metal parts onto a piece of 1mm beading cord. Finish the bracelet by hiding the knot in a gap between the metal wing and the “dress”.

**2.** The knot is made with four or five very tight reef knots (see step No. 3). Tighten after each knot. When pulling the elastic knots, the knot “locks”. Cut off the ends right by the knot and pull the knot inside the bead in order to hide it.

**3.** How to make a reef knot:
