

## Dunne ketting met hanger

v12165

Kleine kralen van steen geregen op sieradendraad. De hanger is bevestigd met een ovale ring. Gesloten met knijpkralen.

### *Hoe werkt het*

**1** Thread genuine stone beads and silver beads onto a piece of beading wire.

**2** Attach an oval jump ring onto the pendant. If the loop of the pendant is turned across, attach another oval jump ring to ensure that the pendant hangs straight.

**3** Thread the pendant onto the necklace.

**4** Close the necklace by attaching two crimp beads with a bead in between. Feed the wire ends through from either side. Pull the ends and squeeze the crimp beads flat using pointy chain nose pliers.
