

Kralen op draad

v12565

Kralen zijn geregen op sterk draad en de sluiting is aan beide uiteinden gelijmd met lijm.

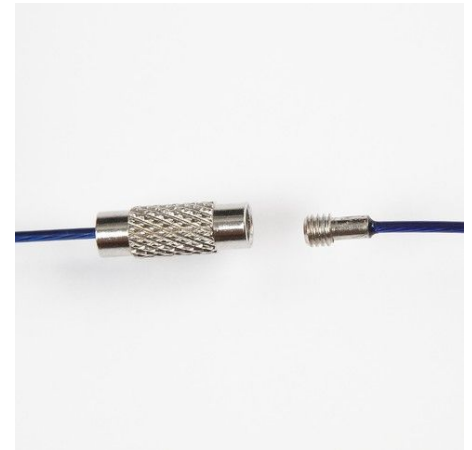

Hoe werkt het

1. The clasp consists of three parts. Attach largest part onto the wire turning the large hole turning towards the end of the wire. Glue on the small part without a screw using instant glue.

2. Thread beads onto the wire before closing the wire at the other end by glueing on the part with the screw.

3. Pull the large part over the small part.

4. Screw on the part with the screw onto the large fastening part.
