

Engelen van papier

v12557

Gebruik het sjabloon om de verschillende onderdelen van de engel uit te knippen uit Vivi Gade Design Papierblok. Lijm de onderdelen aan elkaar met E-Z runner.

Hoe werkt het

1. Print out four or five angels from each template. Cut out each part separately: one whole dress (with a bit of neck), a whole wing, head, legs, hands (with wrists) etc. The templates can be found in the Vivi Gade Paperbook (see the item list).

2. Place the parts onto the different pieces of patterned paper and cut out. If you want the hanging decoration to rotate, cut most of the parts in pairs (mirror images), so that the back of the hanging decoration looks neat.

3. Draw the fine details onto the face and hands. Now glue the parts together using the E-Z runner.

4. Glue a doubled-over piece of string between the head and the hair. Glue the piece of string between two stars.
