

Terracotta met Color Blocker

v12685

Terracotta decoraties zijn gedecoreerd met Color Blocker en A-Color Glass verf.

Hoe werkt het

1. Place the flexible stencil securely on top of the terracotta decoration.

2. Apply Color Blocker onto the flexible stencil design with a spatula. Let it dry.

3. Apply a coat of paint. Let it dry.

4. Use a foam stencil brush to carefully dab off the paint on top of the Color Blocker design.

5. As an alternative you may write or draw directly onto the terracotta decoration with the Color Blocker (comes in a bottle with a tip).
