

Paasversiering van handgeschept papier

v12994

Deze hangende, papieren paasdecoraties zijn gemaakt van handgeschept papier van moerbei en geverfd met behulp van de klassieke waterverf techniek.

hoe werkt het

1. Lightly moisten the paper with water.

2. Scrunch up the moist paper and place it on a piece of plastic.

3. Dab water-colour paint, Art Aqua mixed with water onto the moist paper. Let the paper dry. Leave it in its crumpled up shape, letting the watercolour get a varied and exciting movement in the fibres of the paper.

4. Smooth the dry paper by hand. Draw a pattern using the template for this idea which is a separate pdf file. Cut it out.

5. Use a piece of mercerised cotton yarn for sewing the parts together with tacking stitches. Leave an opening of 5cm for filling the shape with polyester stuffing.

6. Fill the shape with polyester stuffing and close the hole with tacking stitches.

7. Make a piece of mercerised cotton yarn four double for hanging. Thread a bead, a flower and finally the finished paper shape onto the four double mercerised cotton yarn. You may finish with another bead.

Another variant A candle holder cover: measure the paper, cut and sew the two sides together to fit the height and the circumference of a candle holder. You may sew beads and flowers onto the paper in case you want additional decoration.

TIP! The ten different colours of Art Aqua can be diluted and thus made brighter. To achieve a very light pastel: 1.5 ml, equivalent to 20 drops, is filled into a refill bottle containing 80 ml of water. NB! The turquoise colour, which is the strongest in the kit is diluted with only 8 drops.
