

Geweven afbeelding gemaakt van garen en kralen

v12893

De afmetingen van deze geweven afbeelding zijn circa 14 x 14cm. Het is gemaakt door dik Fantasia acryl garen, goudkleurig garen en grote plastic kralen te weven op een klein weefraam. Het ophangstelsel is gemaakt van bloemstokken en garen.

hoe werkt het

1. Wind the trend thread four times around the first block on the loom. This procedure locks it and keeps it securely in place.

2. Thread the trend threads back and forth between the blocks on the loom. Finish by winding the thread four times around the last block on the loom.

3. In order to keep the thread in place safely, you may attach a piece of masking tape on the outside of the loom.

4. Insert a wide lolly stick at the bottom and the top of the loom through the trend threads in order to create a border to distance to the edge of the loom. This non-woven edge is necessary for enabling you to make tassels from the trend thread afterwards.

5. Insert/weave the acrylic yarn up and down, back and forth. When changing the colour of the yarn, start and finish from the middle (approx. eight trend threads from the side in order to avoid yarn ends at the sides of the woven picture. All yarn ends should be at the back of the woven picture.

6. Use the comb to firmly push the woven yarn in place.

7. Whilst weaving thread beads onto the the yarn and place them between two trend threads and include as part of the weaving.

8. Remove the lolly sticks and remove the woven picture from the loom. You may remove the masking tape.

9. Carefully cut open the trend thread loops and tie them around the flower stick in pairs.

10. Secure the yarn ends on the back of the woven picture. Tie knots and trim. Attach a piece of golden thread onto the flower stick at the top for hanging.
