

Ketting met hanger

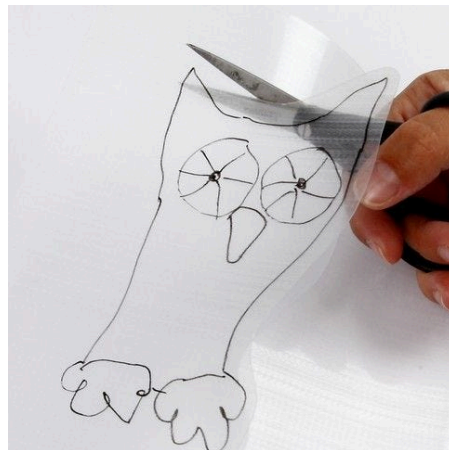

v12814

Kleur een motief van krimpfolie in met een neonkleurige markerstift. Rijg de hanger op een stuk satijnkoord.

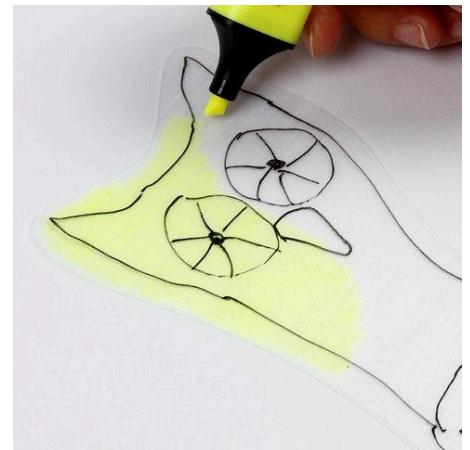

Hoe werkt het

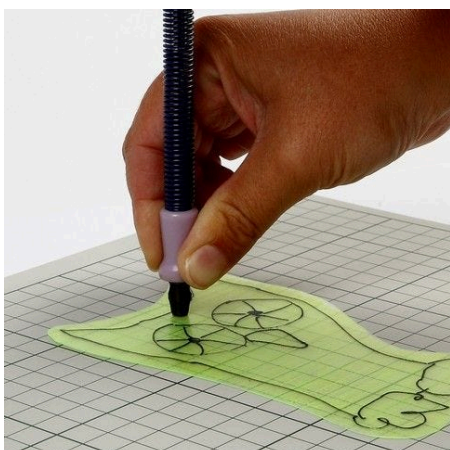

1. Draw a motif on the rough side of the shrink plastic sheet.

2. Cut out the motif.

3. Colour in the motif with a Stabilo Marker.

4. Make a hole in the motif for hanging.

5. Put the motif in the oven at 160°C until it has shrunk and unfolded again.

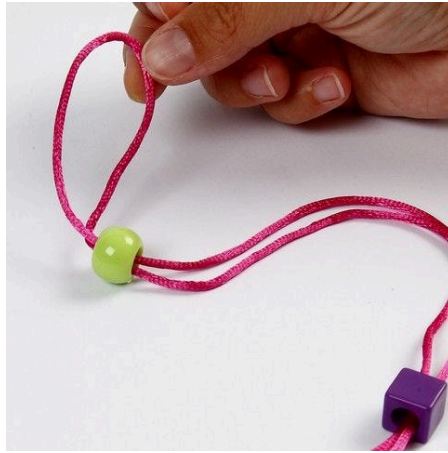

6. Cut a piece of satin cord for the necklace and attach fold-over cord ends onto each end of the satin cord.

7. Insert a round jump ring through the hole of the shrink plastic sheet pendant and through both loops of the fold-over cord ends. Close the round jump ring.

8. Thread large plastic beads onto the doubled-over satin cord to hide the joint.
