

Oorbellen met kralen van steen, hars en glas

v13217

Deze oorbellen zijn oorbellen waaraan kralen op nietstiften zijn bevestigd. Kralen zoals ronde steenkralen, bloemvormige kralen, en druppelvormige, facet kralen.

Hoe werkt het

1. Put a bead on an eye pin and shorten it with side cutters approx. 8mm from the top of the bead. Bend the eye pin backwards, making a loop.

2. Make a pendant from three beads on three eye pins: Use round nose pliers for making a loop on the pin, but do not close the loop completely before attaching another eye pin to the loop. Put a bead onto eye pin No. 2.

3. Attach another eye pin, put a flower-shaped resin bead onto this eye pin, shorten the eye pin approx. 8mm from the top of the bead. Make a loop on the eye pin with round nose pliers and attach the assembled pendant in the loop on the ear wire.
