

Waxinelichten met fineer en sterren.

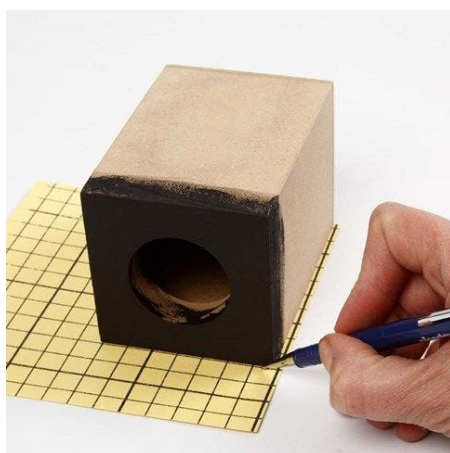

v13117

Deze vierkanten kandelaars zijn geveerd met zwarte Plus Color verf op de bovenkant. De zijkanten zijn bedekt met houtfineer en vervolgens gedecoreerd met nummers en sterren gemaakt met sjablonen en stencils.

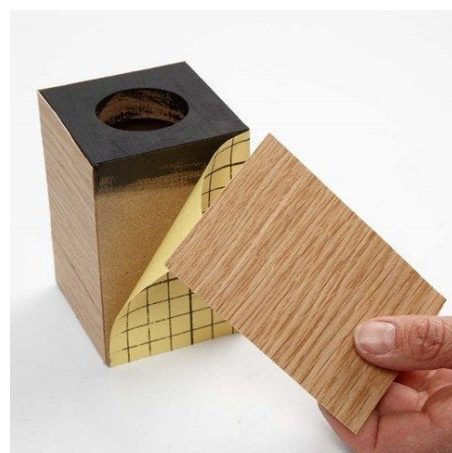

Hoe werkt het

1. Remove the small metal bowl (for the actual candle) whilst painting the top square with black Plus Color Craft paint. NB! Paint over the edges partly down the sides. Let it dry.

2. Use the sides of the candle holder as a template and draw onto double-sided foil tape. Cut out.

3. Remove one of the two layers of protective paper from the double-sided foil tape and attach it onto each of the four sides of the candle holder. Now remove the other layer of protective paper and attach the paper with the wood veneer design. Trim the edges.

4. Print the template with the star, which is available as a separate PDF file for this idea. Cut out the template and transfer the design onto the candle holder using a thin pencil. Paint the star with black Plus Color Craft Paint. Let it dry and fill in the points of the star completely using a thin black marker.

5. Place the stencil with the chosen number on the side of the candle holder and hold firmly with one hand whilst dabbing black Plus Color Craft paint through the number on the stencil using a foam stencil brush.
