

Schilderen op zijde en fixeren met strijkijzer

v13069

Het beschilderen van zijde is een activiteit voor alle leeftijden, afhankelijk van de moeilijkheidsgraad van de gebruikte techniek. Het eindresultaat kan van alles zijn, van een kunstwerk om in te lijsten tot een mooie sjaal om te dragen.

Hoe werkt het

1. Fill in the flowers with paint; i.e. silk colour which must be steam fixed. Do not paint on the lines of transparent Gutta.

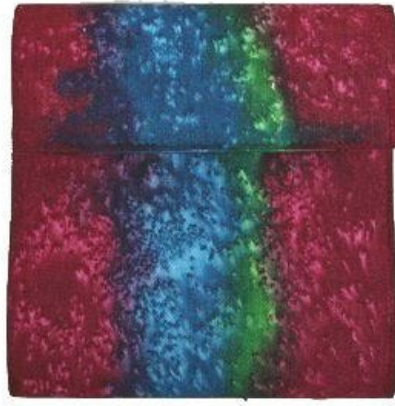

2. Let the scarf dry overnight and fix with an iron, placing a piece of baking paper between the iron and the scarf.

3 Silk Painting with Gutta: Gutta is made from natural rubber - and is probably the most famous outlining product (for marking out areas when using silk colour). It is suitable for silk colours which can be fixed with an iron as well as steam fixed.

4 1. Attach a metal Gutta applicator tip to the Gutta bottle and write text or draw lines in the washed silk. Allow the Gutta to dry and fill out the spaces with silk colour. 2. Fix the silk and rinse out the excess paint and Gutta.

6 1. Wash the silk and dry it if needed. Paint the silk and sprinkle coarse Effect Salt into the wet paint. Let the salt absorb the colour until it is dry. 2. Shake the salt off. Fix the silk and rinse out the excess colour.

5 Silk Painting with Salt: The salt absorbs the paint. This results in exciting designs appearing on the silk. Suitable for silk colours which can be fixed with an iron as well as steam fixed.

8 Place the silk on top of a piece of tin foil and dab/draw liquid wax onto the scarf. Let it dry. Apply silk colour, let it dry. Fix it. Rinse off the liquid wax and the excess colour.

7 Silk Painting with Liquid Wax: Suitable for silk colours which can be fixed with an iron as well as steam fixed.
