

Een hart gemaakt van gehalveerde boomstammetjes

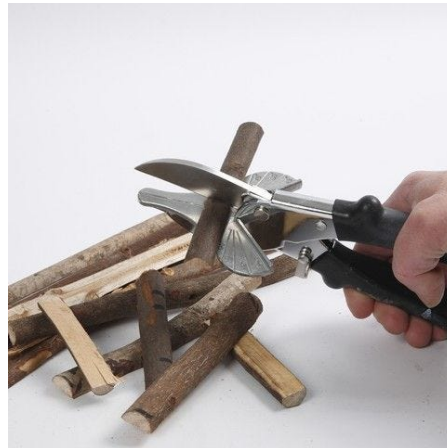

v13061

Dit hart om op te hangen is gemaakt van gehalveerde boomstronken die zijn geknipt in verschillende afmetingen, geverfd en daarna gemonteerd met bloemendraad in de vorm van een hart.

Hoe werkt het

1. Place 12 halved tree trunks across with a spacing of approx. 3-5mm with the flat side against the table. Print out the heart template for this idea. Cut out the heart, place it on top of the tree trunks and outline the heart shape with a permanent marker.

2. Saw or cut each halved tree trunk using the mark made with the permanent marker as a guide.

3. Paint each tree trunk with Plus Color Craft paint in different colours. When dry, sand each tree trunk with sand paper to achieve a rustic look.

4. Start from the tip of the heart and tie the tree trunks together with floral wire. The floral wire is ideal to make a wire for hanging. Alternatively, you may use a piece of natural hemp for hanging.
