

Armband van facetkralen met fashion links

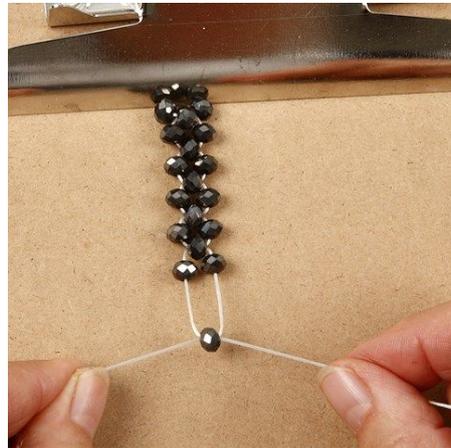

v13368

Voor deze armband zijn facetkralen geregen op een stuk plat elastisch rijgkoord. Een fashion link (ster) is bevestigd aan de armband voor extra decoratie.

hoe werkt het

1. Cut a piece of flat elastic beading cord measuring approx. 120cm. Divide it into two or double it over. Attach the beading cord onto a clip board and thread a faceted bead onto each of the two ends. Now thread each cord end through the same bead at opposite ends simultaneously.

2. Continue using the shown method until the bracelet has reached the desired length.

3. Assemble the bracelet by tying five or six tight knots/reef knots. Hide the knot underneath the star Fashion Link.

4. NB: If there are 36 beads left over, you may make another bracelet with one single row of beads threaded onto a piece of doubled-over flat and elastic beading cord. Finish the bracelet by tying five or six tight knots/reef knots and hide the knot underneath the star.
