

Hanging Decorations using a Fiskars Die

v13327

A hanging decoration made from flowers in different types of paper, cut out using a die in the Fiskars die-cut machine. The flowers are assembled in pairs around a piece of natural hemp or in layers for a 3D effect at one end of a piece of natural hemp.

Hoe werkt het

1. Cut pieces of paper of various designs to approximately suit the size of the Fiskars die. Attach double-sided foil tape to half of the pieces of paper. NB: leave the protective layer on at this stage.

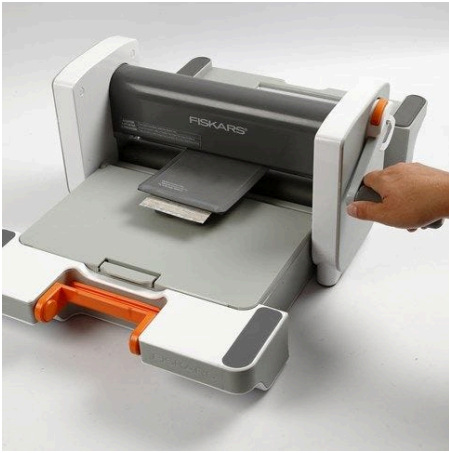

2. Take the die with the Fiskars cutting plate out of the orange box.

3. Place the paper on top of the die and then place the cutting plate on top of the paper.

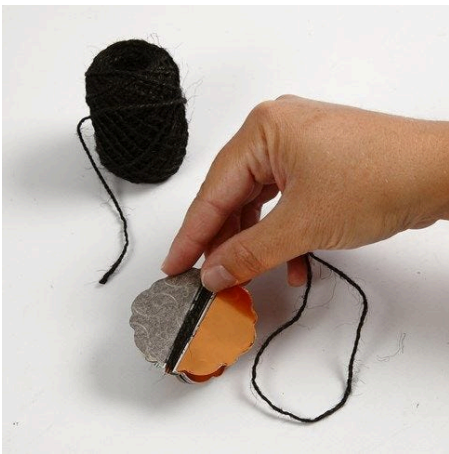

4. Run the assembled “sandwich” consisting of the die, the paper and the cutting plate through the Fiskars die-cutting machine. Use the handle.

5. Place the die in the orange box for easy removal of the finished die-cut flowers.

6. Now assemble the flowers in pairs or in layers with a 3D effect, if folded in the middle. Remove the protective layer of the double-sided foil tape.

7. Place a piece of natural hemp for hanging in the middle of a flower before assembling this with one or more flowers, depending on the desired result.

Another variant A greeting card with a paper collage and die-cut flowers on the front.
