

## Een gevlochten hart met kegels en steranijs

v13690

A heart-shaped garland woven from natural branches, decorated with red and white cotton string with glued-on star anise as a hanging decoration. Pine cone bases, decorated with red wooden beads and Copper Imitation Metal Leaf add further decoration.

### *Hoe werkt het*

**1.** Use pruning shears for cutting as much as possible off the top of the cone as only the bottom of the cone is needed for the decoration.

**2.** Cut two pieces of string. Tie one onto the garland for hanging. Tie on the other as a pendant, decorating it with natural decorations. See next step.

**3.** Glue two or three star anise in pairs around the piece of string. Use a glue gun.

**4.** Decorate the garland with glued-on halved pine cones and star anise.

**5.** Apply Fix Glue onto the garland randomly. Leave it to dry for a bit.

**6.** Attach Copper Imitation Metal Leaf where the Fix Glue is applied. Use a brush with hard bristles and brush off excess Imitation Metal Leaf.

**7.** Glue on the red wooden beads according to your taste. Here we have glued them onto the middle of the cones.
