

Tollen gedecoreerd met verf en getallen

v14100

Deze tollen zijn geverfd in verschillende kleuren met Plus Color acrylverf. Na het drogen zijn details en getallen aangebracht met Poster Hobby markers.

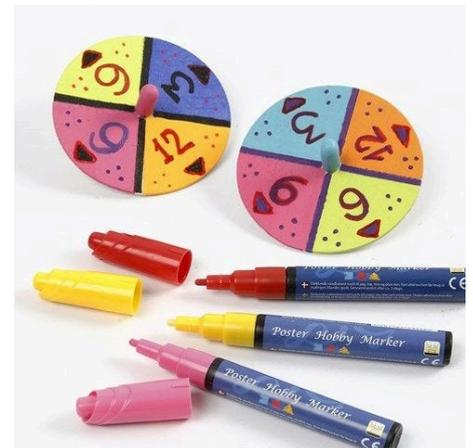

hoe werkt het

1. Divide the spinning top into four areas using power tape in order to paint all four areas in different colours.

2. Paint each area in different colours using Plus Color craft paint. Leave to dry.

3. Decorate with numbers and graphic designs using Poster Hobby markers. A TIP: varnish the spinning top with lacquer. This ensures that the decoration keeps well when the spinning top is being used.
