

Nest van bloemstokken

v11372

Dit nest is gemaakt van kleine stukken bloemstokken die aan elkaar gebonden zijn met bloembinddraad.

Hoe werkt het

1 Cut flower sticks into approx. 50 small 5 cm pieces and three pieces each measuring 20 cm for the base.

2 Tie the three 20 cm pieces together as shown for the base.

3 Tie the small pieces together as shown.

4 Tie the long florist wire with the tied-on wooden pieces onto the "base" as shown. Wrap around about 3-4 times to achieve a good nest effect.
