

Metalen krans met styropor bal

v12158

De metalen krans is gedecoreerd met een geverfde styropor bal.

Hoe werkt het

1. Hang the metal wreath using a piece of striped cotton string. Insert a small piece of brass wire into the wreath and wind to make a small hanging device.

2. Paint and decorate the polystyrene ball using Plus Color. Let it dry.

3. Insert the small metal device into the dry, decorated polystyrene ball and secure it with a blob of glue if necessary.
