

Een kerstkaart met grafisch kerstdesign

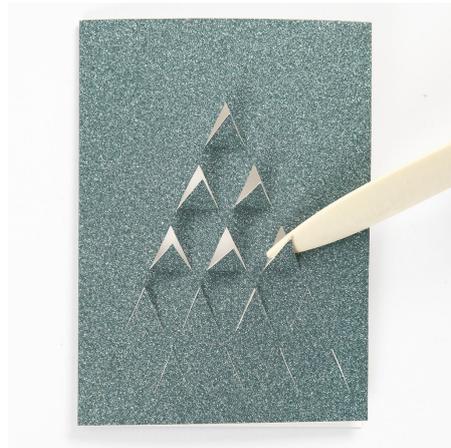

v14738

Met behulp van een sjabloon zijn 15 kleine flapjes geknipt die samen een kerstboom vormen. Design papier is aan de binnenkant bevestigd.

hoe werkt het

1 Print the template which is available as a separate PDF file for this idea. Place it directly onto the front of the greeting card (opened up) and cut through both layers avoiding the dotted lines.

2 Open up each fold.

3 Cut a piece of design paper to the same size as the front of the card and glue it onto the inside of the greeting card, so that this is visible from the front.

4 Make a horizontal cut above the tree and insert the metal clip with the star into the cut.
