

Sleutelhanger gemaakt van leerkoord met houten kralen

v14710

Deze sleutelhanger is gemaakt van een leerkoord gedecoreerd met diverse grote kralen. Sommigen van onbehandeld hout en sommigen geverfd met Art Metal verf in pastelkleuren.

Hoe werkt het

1 Paint some beads with Art Metal paint. Thread each of these onto a flower stick (a helpful tool) and apply two coats of paint to the bead, allowing the paint to dry between each coat.

2 Cut a piece of leather cord measuring approx. 30 cm and tie it tightly onto a split ring. Finish with a tight knot as close to the split ring as possible.

3 Mix the untreated wooden beads with the painted beads and thread them onto the leather cord. Finish with a knot at the bottom and trim the excess cord.
