

Illustratie gemaakt met tekengom

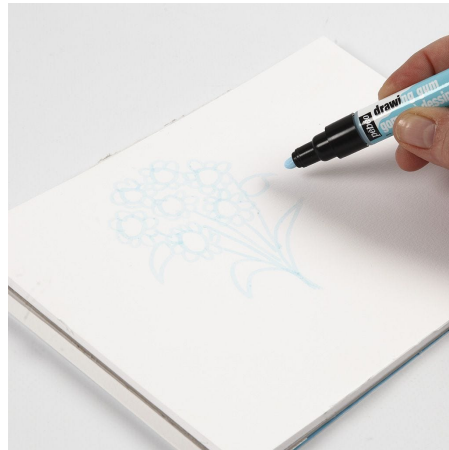

v14329

Deze illustratie is gemaakt door delen van een ontwerp te maskeren met tekengom. Daarna is de tekening gekleurd met waterverf. Na het drogen is de gom verwijderd.

Hoe werkt het

1 The drawing gum is pumped from the cartridge into the tip of the pen by pressing the tip up and down on a piece of paper.

2 Draw a design on a piece of watercolour paper with the pen and leave to dry.

3 Paint over the design with watercolours or water-diluted acrylic paint and leave to dry.

4 Rub off the drawing gum coating using the tip of your finger to reveal the masked design on the watercolour paper.
