

Kuiken van Silk Clay met lange poten met Nabbi strijkkralen

v14603

Dit kuiken is gemaakt van twee styropor ballen, bekleed met Silk Clay. De poten zijn gemaakt van chenille waarop Nabbi strijkkralen zijn geregen.

Hoe werkt het

1 Cover the two polystyrene balls with Silk Clay. Assemble the balls, forming a body with a head.

2 Model the wings and push them onto the body with two balls for the hip joints where the legs will be attached later. Push the eyes, beak and the comb onto the head. Make the comb from Silk Clay which is pressed flat and cut into shape.

3 Shape the chick's feet at one end of two pieces of pipe cleaners and thread on Nabbi beads. Push a leg into the body at the ball forming the hip joint.
