

Konijnen voor decoratie en als speeltje

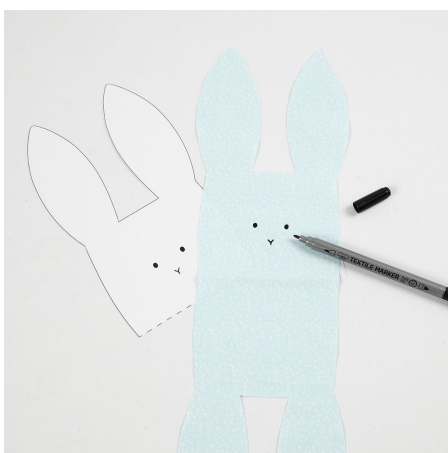

v14811

Deze genaaide konijntjes gevuld met plastic korrels kunnen worden gebruikt voor decoratie in huis, op de tafel, om te spelen of zelfs als een speeltje voor jonge kinderen om hun motoriek te oefenen. Speel met het konijn door het op het hoofd, de voeten en de handen te balanceren en oefen met gooien en vangen.

Hoe werkt het

1 Print the template which is available as a separate PDF file for this idea. Double over the fabric and place the bottom of the template in fold. Draw the outline of the template onto the fabric and cut out.

2 Place the cut-out fabric on top of the template (to see the eyes and nose through the fabric). Draw the nose and eyes onto the fabric with a permanent marker. Fix with an iron following the instructions on the back of the textile markers packaging.

3 Sew together (outer side against outer side). Leave an opening between the two ears.

4 Cut notches in the fabric all the way to the stitches at the ears and at the opening.

5 Fold the bottom of the bunny in each corner and sew the bottom so that it forms a square (see the photo).

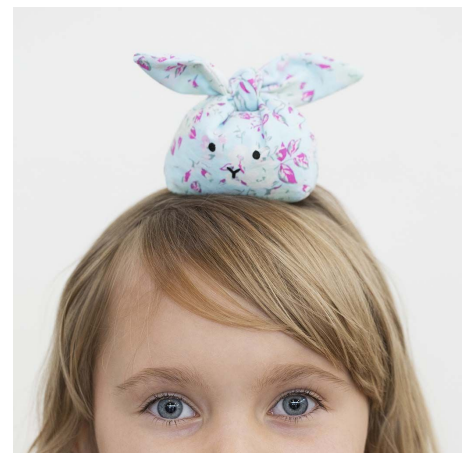

6 Turn the bunny outside in and fill it with plastic pellets. If you want it to be used for practising motor skills or for playing, fill with fewer plastic pellets.

7 Sew between the ears to close the opening and tie a double knot to form the right shape of the ears.
