

## Wandkleed gemaakt van pom-poms

v14802

Dit wandkleed is gemaakt van pom-poms die zijn vastgemaakt op een stuk stramien. Elke pom-pom is gemaakt van acrylgaren op pom-pom maker. Het geheel is opgehangen aan een display stok.

### *hoe werkt het*

**1** Cut the mesh to your chosen size.

**2** Cut a piece of yarn to your chosen length and double it over. This is to be used for tying the pom-pom at the end. Place this doubled-over piece of yarn on the tool as illustrated. Now wind the yarn from the ball approx. 100 times around the widest of the two forks of the tool. (NB: this tool enables you to make pom-poms in two different sizes, dictated by the narrow or wide fork).

**3** Tie the doubled-over piece of yarn tightly around the wound bundle of wool.

**4** Cut the yarn open on one side of the tool. The tool has a deep groove all the way around to allow room for the blade of the scissors.

**5** Tighten the doubled-over piece of yarn again and cut the yarn open on the other side of the tool. Tighten one more time and finish with a couple of double knots.

**6** Trim the pom-pom to make it as round as possible. (Leave two of the long yarn ends for tying and cut off the other two yarn ends).

**7** Tie each pom-pom onto the mesh using the long yarn ends of the pom-poms.

**8** Tie the finished wall hanging onto a stick. Twist the long piece of yarn and attach it onto the metal loop on each side of the stick for hanging.

**Another variant** -

**Another variant** A TIP: Add a lift to an old pair of slippers by gluing on pom-poms or make holes in the slippers and tie the pom-poms onto the slippers.
