

Zachte mat van pom-poms

v14801

Deze mat is gemaakt van zelfgemaakte pom-poms van acrylgaren, die zijn vastgemaakt op een stuk anti-slip stramien.

hoe werkt het

1 Cut the mesh to your chosen size.

2 Cut a piece of yarn to your chosen length and double it over. Place this doubled-over piece of yarn on the tool as illustrated. Now wind the yarn from the ball approx. 100 times around the widest of the two forks of the tool. (NB: this tool enables you to make pom-poms in two different sizes, dictated by the narrow or wide fork).

3 Tie the doubled-over piece of yarn tightly around the wound bundle of wool.

4 Cut the yarn open on one side of the tool. The tool has a deep groove all the way around to allow room for the blade of the scissors.

5 Tighten the doubled-over piece of yarn again and cut the yarn open on the other side of the tool. Tighten one more time and finish with a couple of double knots.

6 Trim the pom-pom to make it as round as possible. (Leave two of the long yarn ends for tying and cut off the other two yarn ends).

7 Tie each pom-pom onto the mesh using the long yarn ends of the pom-poms.

Another variant A TIP: Add a lift to an old pair of slippers by gluing on pom-poms or make holes in the slippers and tie the pom-poms onto the slippers.
