

## Kerststerren van vellum papierstroken

v15108

Deze sterren zijn gevlochten van vellum vlechtstroken en gouden vlechtstroken bedekt met zijdedraad.

### *Hoe werkt het*

- 1 Weave a star following the instructions on the pack. Attach a split ring (you may use split ring pliers) and tie a gold thread on the split ring.

- 2 You may attach LED lights onto the stars by pushing a hole to hold the light bulb in the middle of each star using a pointed flower stick or an awl.
