

Geknoopt wandkleed van Cotton Tube Yarn

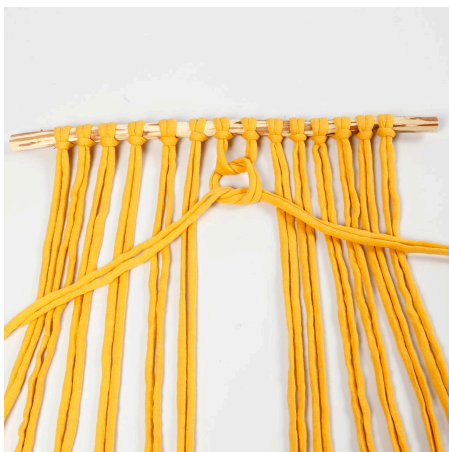

v15103

Dit wandkleed is geknoopt met de macramé techniek. Het is opgehangen aan een display stok met Cotton Tube Yarn.

Hoe werkt het

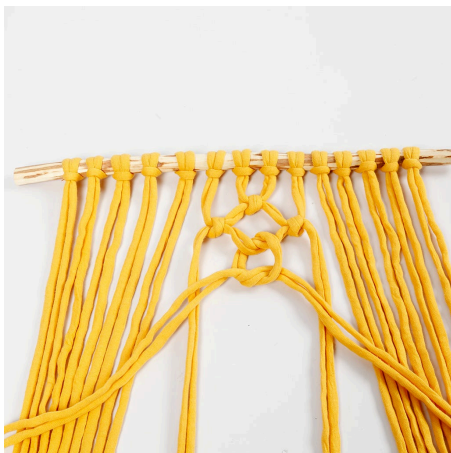

1 Cut 14 pieces of cotton tube yarn, each measuring 275 cm. Double them over and tie them around the stick as illustrated in the photo.

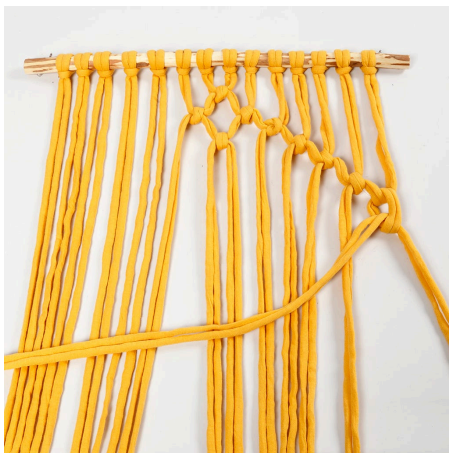

2 Begin with the two middle doubled-over pieces of cotton tube yarn. Tie a knot consisting of two knots (a reef knot).

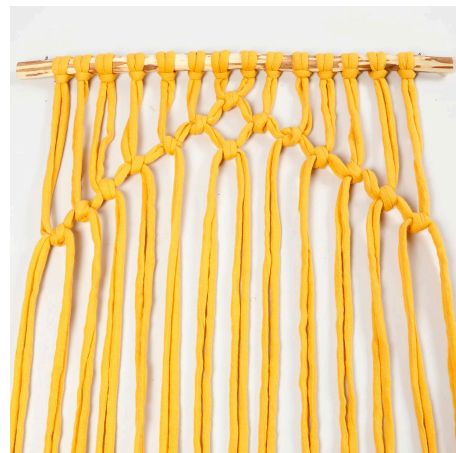

3 Now braid the two next doubled-over pieces of cotton tube yarn on either side a bit further down.

4 Tie a reef knot in the middle.

5 Continue like this all the way down and to the right. A total of seven reef knots.

6 Repeat in the other side (to the left).

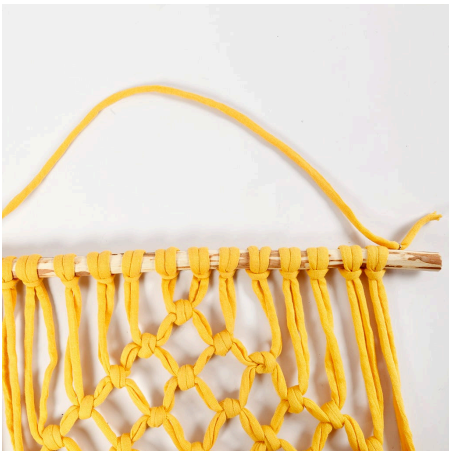

7 Fill in with reef knots in between, creating half a diamond shape. Now tie reef knots and mirror the shape.

8 Now tie reef knots and mirror the shape. Finish with the reef knot in the middle. Now the diamond shape is complete.

9 Tie knots on all the ends and trim, making them shortest in the middle and longer towards each side.

10 Tie a piece of cotton tube yarn onto the two loops on either end of the natural stick.
