

## Een Faux Leather sneeuw gordijn

v15001

Deze sneeuwvlokken van Faux Leather zijn met behulp van een naaimachine op een koord genaaid. De koorden zijn bevestigd aan een display stok.

### *Hoe werkt het*

**1** Start by pulling the two threads (the machine thread and the bobbin thread) to the back of the sewing machine to ensure there is enough thread for hanging. Now place the first snowflake under the pressure foot and sew down through the middle of the snowflake.

**2** Continue sewing without anything under the pressure foot to make a gap between the next snowflake. Place another snowflake under the pressure foot and sew down through the middle of the snowflake.

**3** Continue like this until a suitable length is reached. Cut off the threads leaving a gap from the last snowflake.

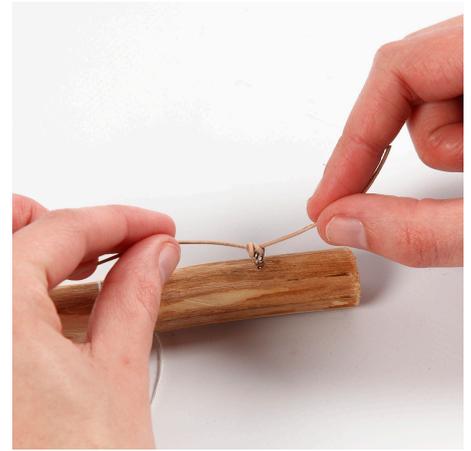

**4** Tie a double knot at each end to secure the threads.

**5** Sew four strings and tie them around the stick.

**6** Tie a leather cord through the loops at each end of the stick for hanging.
