Decoratieve ballen van Faux Leather Papier

v15314

Maak deze decoratieve ballen van Faux Leather papierstroken bedrukt met bloemmotief.
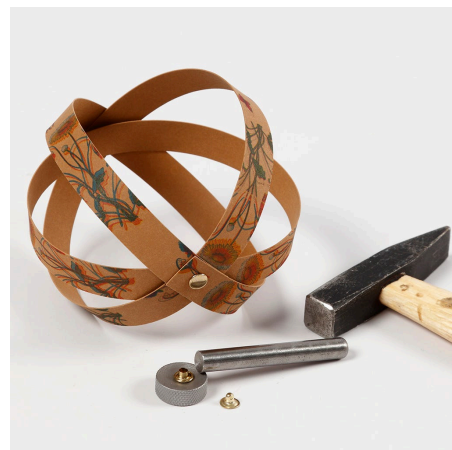

Hoe werkt het

1 Cut 4 pieces of faux leather paper strips to your chosen length, depending on the size of bauble you want. Gather the strips and make holes at both ends approx. 1 cm from the ends of each strip using revolving hole punch pliers.

2 Gather three of the strips and set a rivet by striking the rivet setting tool with a hammer as illustrated in the picture.

3 Turn over the bauble and spread the strips out equally.

4 Make a hole for a rivet at the top.

5 Set the rivet by striking the rivet setting tool with a hammer.

6 Place the fourth strip around the bauble. Make a hole for a rivet where both ends of the strip meet and set a rivet by striking the rivet setting tool with a hammer.

7 Make a hole and set a rivet at the opposite side of the bauble by striking the rivet setting tool with a hammer. You may add more rivets in the paper strips when assembling large baubles.
