

Geld cadeau geven in gedecoreerde 3D lijst

v15520

Versier deze diepe 3D dubbelzijdige houten lijst met een transparante perspex voorkant met een foto, design papier, tekst en vlaggen. Verf de lijst en de cijfers met Plus Color hobbyverf en vul de dubbelzijdige houten lijst met bankbiljetten en munten.

Hoe werkt het

- 1 Paint the numbers with Plus Color craft paint.

- 2 Carefully remove the strings from the inner frame and remove the pegs. Paint all the visible surfaces of all three parts of the frame.

- 3 Print out an amusing photo of the person celebrating their birthday and attach it onto a piece of design paper. Glue this onto the back panel.

4 Write text with a Uni Posca marker.

5 Cut small flags from design paper. The flags should measure 2 x 3 cm each when folded in the middle.

6 Glue the two strings together. Tie a knot at the ends of the glued string and tie a knot on the string where you want to glue it onto the inside of the frame. Glue the knots onto the inside of the frame using a glue gun. The string should run from the inside top of the frame to one side and should finish on the opposite inside side of the frame.

7 Attach double-sided adhesive tape onto the back of the flags and squeeze them together around the string. Make sure to cover the glued joint with a flag.

8 Assemble the frame by fixing the transparent perspex front onto the frame, then insert the inner frame. Glue the numbers onto the bottom of the frame using a glue gun. Fill the bottom of the frame with rolled-up bank notes and coins by tipping the frame a bit forward. Finally, attach the back panel and close the frame.
