

Kleurrijke vlinders van Fimo klei

v15664

Maak kleine vlinders van Fimo Klei voor home deco. Decoreer de vlinders met een patroonroller en snijd ze uit met een uitsteker. Fixeer in de huishoud oven op 110°C voor 30 minuten.

Hoe werkt het

1 Roll the Fimo modelling clay flat on baking paper in a size that fits the shape cutter.

2 Make a pattern in the Fimo modelling clay using a pattern roller.

3 Cut out butterflies with the shape cutter. Fix the butterflies for 30 min. in a household oven at 110°C. NB: if you want to hang the butterflies, make a hole for hanging with a wooden flower stick prior to fixing in the oven.

4 Once the butterflies have cooled down, decorate them with Plus Color craft paint so that the paint fills the pattern.

5 Wipe off the excess paint. When dry, varnish the butterflies with Fimo gloss varnish. The varnish provides a shiny, protective and transparent surface.

6 Attach Power Tack adhesive onto the back of the butterflies for sticking onto various surfaces. If you have made a hole for a wooden flower stick prior to fixing in the oven, you may attach a butterfly onto a stick and place it in a flower pot for decoration.
