

Monsters van Fimo klei

v15663

Maak zelf monsters van Fimo klei. Fixeer de monsters in een huishoudoven voor 30 minuten op 110°C. Maak een gat bovenin om de monsters te kunnen ophangen, of gebruik Power Tack om de monsters op oppervlakken te bevestigen.

Hoe werkt het

1 Roll out the monsters' bodies onto baking paper using a Fimo roller.

2 Make monsters in different shapes and colours.

3 Make monsters in different shapes and colours.

4 Decorate the monsters with different patterns.

5 Add eyes, mouth and teeth.

6 Gently roll the monsters evenly and flat when you have finished decorating them. You may add a furry effect using modelling tools. Fix the monsters for 30 min. in a household oven at 110°C. Varnish them with Fimo gloss varnish when they are cold which gives a shiny, transparent and protective surface.

A tip: You may make a hole for hanging prior to fixing in the oven. Alternatively you may attach the monsters onto various surfaces by attaching Power Tack adhesive onto the back.
