

Enveloppen van recyclede papier gedecoreerd met goud folie

v15576

Decoreer de voorkant van een envelop van recyclede papier met goud papier.

Hoe werkt het

1 Cut 4.5-5 cm wide gold paper strips. Trim the strips to the same height as the envelope.

2 Punch out a heart in the paper strips using the die-cutting and embossing machine.

3 Attach a gold paper strip onto the front of the envelope using double-sided adhesive tape.

4 Make a lining for the envelope by drawing around the envelope on a piece of gold paper and cutting it out. Place the paper inside the envelope and attach it with double-sided adhesive tape onto the inside flap of the envelope.
