Kaart met een gevouwen kerstboom

De bomen zijn gevouwen van Vivi Gade Design papier en op een kaart gelijmd met een extra vel, vezelpapier en strasstenen.

01 Glue a piece of a sheeted pink card onto the card using double-sided tape. Also glue a piece of fibre paper onto the card.

02 Cut five squares from Vivi Gade Design Paper measuring 5 x 5cm, 6 x 6cm, 7 x 7cm, 8 x 8cm and 9 x 9cm. Fold each piece in half, turn and fold again.

03 Then fold both diagonals. Smooth with a bone folder.

04 Fold two sides towards the centre.

05 Fold the two front ends down as shown.

06 Start making the Christmas tree by attaching the largest folded square onto the bottom of the card using double-sided tape.

07 Attach the five parts one by one.

08 Cut a gold star using the template. Glue this onto a piece of card and cut out the star.

09 Attach 3D foam pads onto the star.

10 Attach the star onto the card.

11 Attach rhinestones in the corners of the card.
