

Watercolour flowers on plastic eggs

v16163

Paint simple spring flowers on plastic eggs using watercolour markers.

Hoe werkt het

1
Use a watercolour marker for drawing five small v-shapes in a circle.

2
Use the water brush to brush the v-shapes into petals. The more water, the lighter the colour, but avoid using too much water or the paint will run.

3
Add further details with watercolour markers; for example, dots, texts and leaves. Make the leaves using the same technique used for making the petals.
