

Sustainable fish

v16586

Place Nabbi fuse beads from biodegradable plastic onto a pegboard using your imagination to conjure up these small adorable fish. Iron the bead designs and attach a string for hanging the fish on a branch. NB: Should the fish end up in the sea, the plastic will dissolve without harming the marine environment.

Hoe werkt het

1 Place Nabbi fuse beads onto a hexagonal pegboard and design the fish using your imagination.

2 Place the pegboard on an even surface and place the baking paper on top. Carefully iron on top without pressing too hard until the top layer of the beads are melted together.

3 Wait for a minute. Now remove the baking paper and leave the fish to cool completely before attaching a string for hanging.
